The dehumidifier automatically stops when the water container is full and a red warning light will come on. A high electrical efficiency is achieved by the system. An auto-defrost feature is incorporated in the system to keep the unit from freezing during low temperature and humidity operation.

The unit is very SILENT ! It has anti-vibration bush mountings for its compressor and the body casing is made of ABS plastic which absorbs and shields noise effectively. It measures less than 46 dB during operation. That is just even quieter than a casement air condition unit.
